I had a chance to review this proposal. I don't know what the traffic volume would be out of the property but, if it is truly just an autobody shop, I can't imagine it being more that it was before. The only difference will be all traffic will come out of 1 driveway instead of the 2 driveways. The main driveway remains the same as it is today, oversized for 2 way traffic. The line of sight is good and will be pretty clear to enter and exit. The only thing I have noticed while reviewing the packet, is we have a "midblock" crosswalk in front of the property. This crosswalk has no white downward or directional lighting applied to it. I would request that be added.
