

Staying Up to Date with COVID-19 Vaccinations 2025-2026

Getting vaccinated is the strongest way to protect yourself from serious illness.

You are encouraged to get vaccinated if you:

- Are 6 months and older
- Are at high risk of exposure
- Never received a COVID-19 vaccine
- Are at high risk risk of severe illness
- Are moderately or severely immunocompromised
- Are pregnant, breastfeeding, trying to get pregnant, or might become pregnant in the future

Current COVID-19 Vaccines:

Moderna

- SPIKEVAX is recommended for those 6 months and older
- mNEXSPIKE is recommended for those 12 years and older

Novavax

- NUVAXOVID is recommended for those 12 years and older

Pfizer

- COMIRNATY is recommended for those 5 years and older
